All prices are subject to change.**

**Please note:**

Please be appreciative that we cannot assume liability if not all information and details are revealed. In this case the use of our distributed products will take place at one's own risk.

**Additional & general information concerning the handling of lithium-ion batteries:**

Lithium-ion batteries are considered generally as dangerous goods. According to our experiences and to meet the requirements of the Federal Institute of Material Research and Testing (BAM, the German national authority for the transportation of lithium-ion batteries) lithium-ion batteries have to be specially safeguarded.

The use of **PyroBubbles**<sup>®</sup> for the transportation of lithium-ion batteries in containers other than our complementary **LIONGUARD**<sup>®</sup> boxes is prohibited due to safety-related reasons.

Our distributed product **LIONGUARD**<sup>®</sup> is a purpose built system for the collection and the transport of lithium-ion batteries. The components of the system are carefully matched and the combination of these parts facilitates the special properties of the product **LIONGUARD**<sup>®</sup>.

The delivered products remain our property till the agreed sum is paid in full.

Delivery according to the contents of our terms and conditions to the exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG)

Should Genius Technologie GmbH violate the laws of the European Union, the United States, the USA or individual countries which are enacted in the fight against terrorism or which regulate trade restrictions such as embargoes, Genius Technologie GmbH is entitled to revoke, To terminate the service and to terminate the order insofar as this does not trigger any liability claims.

I would be very pleased if this offer suits you.

Please contact me if you require any additional information.

Best regards,  
Roland Meider
